

Building Operational Excellence Home-Based Palliative Care

Building Operational Excellence: Home-Based Palliative Care identified leading operational practices in home-based palliative care to address gaps and improve the quality and efficiency of end-of-life care. As part of this work, the CHCA conducted an evidence synthesis on Managing Medication and Supplies in Home-Based Palliative Care.

10 ways to manage medication and supplies in the home setting

- Create policies and procedures specific to managing controlled drugs (i.e. access, storage, disposal).
- 2 Develop patient and caregiver education materials on safe storage and disposal practices.
- Educate and assist patients and caregivers with medication management.
- Use emergency medication kits for easy and timely access.
- Learn about the <u>HPSA</u> medication and sharps return programs in BC, MB, ON, PEI.
- Tap into pharmacists' expertise for medication safety and delivery options (short versus long-acting).
- 7 Encourage patients and caregivers to keep a medication diary.
- Use SMART Pump infusion devices.
- **5** Learn about the <u>Patch-For-Patch Fentanyl Return Program</u> in Ontario.
- Check out medication disposal pouches; a safe inactivation and disposal method.

The Canadian Home Care Association (CHCA) is a national non-profit membership association dedicated to strengthening integrated community-based care. We represent public and private organizations that fund, manage and provide services and products in the home and community. The CHCA informs policy, influences practice and advocates for better home and community care for all Canadians.
